

## Topic home- work menu

Sadly, it looks as though our plans for our Easter Pop up shop will have to be put on hold for now. When we return to school, we will either do the craft fayre at a later date or see if we can adapt our ideas and hold a summer fayre instead.

Our topic-based homework to complete will still be based around this topic. Please choose 3 things from this menu to complete whilst at home.

### DT

Can you create one or more of the Easter craft fayre ideas at home using recycled materials? Ideas for this are included on the next page.

### Design an advert for your product

This could be:

- An eye-catching poster with information about the product.
- A leaflet.
- A script for a TV advert.

### Art

Try one of the step by step drawings or do a detailed drawing yourself.

### Science

In science we have been exploring the life cycles of plants and animals. We are currently re-growing some celery at school. Can you grow a new plant or re-grow something using food scraps?

Some ideas for re-growing plants from scraps are on the next page.

### Design an Easter card.

Can you make a unique Easter card? We've included some card in your home learning pack.

### Write an Easter poem

This could be an acrostic poem, a poem that rhymes, a shape poem or a funny poem! Make it really descriptive by using adjectives and similes.

### Easter recipe

Write an Easter recipe for the class to make. Remember that you'll need to work out how many ingredients we will need to make the food item for **28** children.
