Dear Parents and Carers

Latest guidance for children

Latest Government Covid advice is as follows:

Children and young people who are unwell and have a high temperature should stay at home and avoid contact with other people. They can go back to school, college or childcare, and resume normal activities when they no longer have a high temperature and they are well enough to attend.

It is not recommended that children and young people are tested for COVID-19 unless directed to by a health professional. If a child or young person has a positive COVID-19 test result they should stay at home and avoid contact with other people for 3 days after the day they took the test. After 3 days, if they feel well and do not have a high temperature, the risk of passing the infection on to others is much lower and they can return.

Guidance for adults- positive COVID-19 test result

Avoid contact with other people for 5 days after the day you took your test. Many people with COVID-19 will no longer be infectious to others after 5 days. If you have a positive COVID-19 test result, try to stay at home and avoid contact with other people for 5 days after the day you took your test.

Regards
